[How to Cut Magnet Sheets for Die Storage](#)
Blog Post January 25, 2024

CUTTING & SCORING MEASUREMENTS:

For regular sized die sets (two 5"x7" sheets):

- In portrait orientation, cut at 7".
- Rotate and cut at 5".
- Cut at 5" again for the second one.

For large square die sets (you'll get one large and one small magnetic sheet):

- In landscape orientation, cut at 6".
- Rotate the cut piece and cut at 6 1/2".
- With the remaining piece, rotate it and cut at 7".

INSTRUCTIONS: [Click here for video](#)

Note: There are two sides to the magnetic sheet. The shinier side has the strongest magnetic pull, so put your dies on that side.

*Tips:

- Label your die set as soon as you get it with the number of dies in the set.
- Draw an outline of the dies on the paper it comes on to make replacing them easier.
- You can draw an outline on the magnetic sheeting where the dies should go. You can also write the number of dies.

SUPPLIES:

Die Cutting Machines come in 2 sizes:

[Mini Cut & Emboss](#)

[Regular Cut & Emboss](#)

[Paper Trimmer](#)

The following products I bought on Amazon. I will earn a small commission if you purchase using this link, but it will not increase the price to you.
