

[Attach Sticker Labels to Stamps](#)

Blog Post July 25, 2024

INSTRUCTIONS: [Click here for video.](#)

1. Peel sticker from sheet and place it on stamp block.

3. Find the matching stamp. Peel off the backing.

2. Rub the back of the sticker in place to ensure it is attached well. Peel off the backing.

4. "Stamp" the sticker onto the back of the stamp by lining up the block over the stamp. Double check that all the edges are lined up and press down.

5. You can easily tear the rubber stamp from the foam backing if you don't remove it correctly from the stamp block. Make sure to grab all the way down where the sticker meets the block...do not grab just the orange rubber. Grab the stamp with the side of your thumb.

6. Don't throw away the material that the stamps come in. Remove the backing and put it back into your stamp case. Return each stamp to its proper place and always be able to see if one is missing!
