Cardstock Insert: 5" x 6 ½"

Stamps are small and easy to misplace, which is why I use a simple trick to create a reference for every stamp, so you'll instantly see if one is missing.

1. Don't remove the stamps from the thick plastic sheet. Clean them with your Stampin' Scrub
2. Ink them up while they're still on the plastic
3. Stamp the entire sheet onto a piece of cardstock
4. Keep this reference with your stamp set in the case.

Simple tips to condition your new stamps so they stamp beautifully from the start.

- Clean them first with your Stampin' Scrub to remove any residue
- Stamp a few times on scrap paper to "break them in"
- If the ink is still beading up, use embossing ink, it will make the surface sticky
- Repeat until you get a great impression.
- Using a Stampin' Pierce mat adds a little cushion to aid in getting a great impression, too!

SUPPLY LIST: [Click here for supplies](#)

- Basic White Cardstock
- Tuxedo Black Memento Ink
- Stampin' Scrub
- Stampin' Mist
- Stampin' Pierce Mat
